INNOVATIVE HEATING SOLUTIONS

## Night falls and profit soars.

You'll see your profits soar when your customers begin toasting longer into the night and later into the season under the warmth of a patioSchwank heater.

The patioSchwank 4000 provides comfort that they can feel, allowing customers to enjoy a longer night out. Schwank offers the premier selection of heaters in the industry for wide-open patios, "tight spots" and even under canopies. So don't be fooled by appearances, while many patio heaters look the same, even after a few drinks, there really is a difference.

Just compare the patioSchwank 4000 series features:

- 1) **Double Mantle:** to provide strength and longevity at heat contact
- 2) **Stainless Steel Flame Screen:** which widens the flame for better heat distribution to mantle surface
- 3) **Fuel Chamber:** that pressurizes and homogenizes fuel/air mixture for clean, complete burn
- 4) **Tall Stainless Steel Base:** for durable long life construction
- 5) **Multi-Directional Combustion Air Inlets:** stabilizes flame in buffeting winds

And only Schwank offers portable or fixed options for either propane tank or natural gas connection with all of our models.

Schwank invented the infra-red heater and we remain the world leader over 50 years later. So choose one of our patio heaters and throw away the express menu.

Your customers are staying for last call.
